

Compact Gasoline Engine for Small Machinery

This compact gasoline engine is designed for a variety of applications. It features robust construction and efficient combustion, making it suitable for small machinery and power tools.

Product Overview

Compact Gasoline Engine Overview

The 139F gasoline engine is a compact and powerful solution designed for various small machinery applications. Engineered for efficiency and reliability, this unit offers a portable power source suitable for power tools and specialized equipment. Its robust construction ensures long-lasting operation, while the design focuses on ease of starting and simplified maintenance for professional users.

Technical Specifications

Model Number	139F
Displacement	31 ml
Net Weight	3.5 kg

Performance Metrics

Key Performance Metrics

0.7 kW

Maximum Power

6500 r/min

Rated Speed
