

Compact Gasoline Powered Mini Tiller

This mini tiller is a compact and efficient agricultural machine designed for small-scale farming and gardening applications. It features an emergency stop device and adjustable tines that can be configured for various soil types and working depths.

Product Overview

Compact and Efficient Tilling Solution

The SRIZ135 Mini Tiller is a compact and efficient agricultural machine designed for small-scale farming and gardening applications. It features a robust engine providing ample power for tilling and cultivating soil, with adjustable tines that can be configured for various soil types and working depths. Its compact size and maneuverability make it ideal for use in confined spaces, while the design ensures ease of use and maintenance for preparing seedbeds and general soil cultivation.

Performance & Efficiency

Fuel Efficiency

Low Fuel Consumption • Stable Power Output

Engine Type	Four-stroke gasoline
-------------	----------------------

Operational Features

Key Applications

- Seedbed preparation
- Weeding
- General soil cultivation

Design Advantages	Compact, Maneuverable, Adjustable Tines
