

Compact Hydraulic Excavator

This compact excavator weighs 1720kg in canopy configuration or 1850kg with a cabin. It has a standard bucket capacity of 0.05m³ and is powered by a 14.7kW engine.

Overview

Compact Excavator Overview

This compact excavator is designed for high-performance operations in confined spaces. Built with a robust hydraulic system, it offers significant digging force and excellent maneuverability for various landscaping and construction tasks. The machine balances fuel efficiency with operational power to deliver long-term reliability on the job site.

Performance Metrics

Key Performance Indicators

16 Mpa

Hydraulic Pressure

10 KN

Max Digging Force

14.65 KN

Max Traction

Maximum Gradeability	58 %
Travelling Speed	2 km/h

Hydraulic System

Variable/Fixed Displacement Pump Capacity	8.2 + 8.2 + 3.2 ml/r
---	----------------------

Operation & Control

Platform Swing Speed	10-12 rpm
Digging Arm Swing Angle	49° left / 49° right
