

Compact Hydraulic Excavator

This mini hydraulic excavator features a strong power system for high reliability. Its telescopic crawler allows it to navigate and operate in narrow spaces.

Overview

Compact Versatility

This compact mini hydraulic excavator is engineered for high performance in tight spaces, making it an ideal choice for landscaping, construction, and demolition tasks. Its zero tail swing design and robust hydraulic system ensure efficient digging and lifting capabilities even in confined areas. Designed with operator comfort and durability in mind, this machine offers reliable service and easy transportability between job sites.

Performance

Key Performance Metrics

1.6 m Digging Depth	0.02 m³ Bucket Capacity	2 km/h Max Travel Speed
-------------------------------	--	-----------------------------------

Operating Weight	880 kg
------------------	--------

Design Features

Primary Applications

- Landscaping
- Construction
- Demolition

Design Highlights	Compact Size, Zero Tail Swing, Powerful Hydraulic System, Intuitive Controls
