

Compact Hydraulic Excavator

This compact hydraulic excavator is designed for versatility and efficiency in various construction and excavation tasks. Its small size allows for operation in confined spaces, while its hydraulic system provides ample power for digging, lifting, and grading.

Overview

Compact Hydraulic Excavator WZ60

The WZ60 is a versatile compact hydraulic excavator engineered for efficiency in confined construction and landscaping environments. Featuring an imported high-performance engine and advanced hydraulic components, it ensures superior digging power with optimized fuel economy. The operator-focused design includes a fully enclosed cabin with air conditioning and an ergonomic suspension seat for maximum productivity during extended shifts.

Performance & Hydraulics

Hydraulic System Highlights

- Imported high-performance hydraulic components
- Precise flow distribution
- Advanced complex coordination and control
- Single cylinder, single rocker arm design

Rotation Capability

360-degree full hydraulic rotation

Construction & Durability

Structural Materials

Low alloy steel, Electrophoresis coated auto-panel

Operator Comfort

Cabin Equipment

- Fully enclosed design
- Air conditioning
- Suspension deluxe seat

Operational Efficiency

Key Operational Metrics

360 degrees

Rotation
