

Compact Hydraulic Excavator

This compact excavator weighs 1850kg and has a 14.7KW/2200rpm rated power. It features a standard bucket capacity of 0.05m3 and a standard bucket width of 470mm.

Product Overview

Compact Excavator Efficiency

This versatile 1850kg compact excavator is engineered for high performance in tight spaces, making it an ideal choice for urban construction and precision landscaping. Featuring a robust hydraulic system, it offers reliable operation with a 14.7KW engine, ensuring productivity while maintaining fuel efficiency. The design prioritizes operator comfort with excellent visibility and ergonomic controls, backed by essential safety systems.
