

Compact Kitchen Food Processor

This compact food processor is designed for efficient food preparation in smaller kitchens. It features a durable plastic housing, a clear processing bowl with a feed chute, and a stainless steel blade for chopping, slicing, and pureeing.

Product Overview

Compact Performance

The YD-FP-807 is a versatile food processor engineered for efficient food preparation within space-constrained environments. It features a durable construction and a high-performance stainless steel blade system capable of chopping, slicing, and pureeing. This reliable unit is designed to streamline daily kitchen operations such as sauce creation, vegetable preparation, and dip processing.

Technical Specifications

Model ID	YD-FP-807
Motor System	Direct-drive motor
Controls	On/Off Switch

Material & Design

Housing Material	Durable Plastic
Blade Material	Stainless Steel

Features

Processing Functions

- Chopping
- Slicing
- Pureeing

Design Highlights

Compact Size, Clear Processing Bowl, Integrated Feed Chute
