

Compact Laser Level Tool

This compact laser level tool is suitable for alignment and leveling tasks. It features a central switch for easy operation and a multi-sided design for versatile positioning.

Overview

Compact Laser Leveling Solution

This compact laser level tool is designed for precision alignment and leveling tasks in both DIY projects and professional construction environments. Featuring an intuitive central switch for easy operation, its multi-sided design allows for versatile positioning on various surfaces. It is a reliable, class II laser device engineered for accuracy and ease of use in general leveling applications.

Technical Specifications

Laser Class

Class II

Model Number

KC-064Z

Max Output

1 mW

Wavelength

650 nm

Features

Key Features

- Compact and portable design
- Centralized switch for simplified operation
- Multi-sided housing for versatile positioning
- Suitable for construction and DIY leveling
