Product Overview

Compact Laser Precision

This advanced laser rangefinder is an optimized upgrade designed for professional measurement tasks. It offers expanded functionality beyond basic distance tracking, including calculations for area, volume, angles, and Pythagorean measurements. With an extended range of 40 meters and a compact, durable design, it is an essential tool for precise indoor and outdoor site assessments.

Technical Specifications

Measurement Functions

- Distance
- Angle
- Pythagorean
- Area
- Volume
- Length difference

Maximum Measuring Distance

40 m
