Product Overview

Compact Laser Rangefinder LS-1

The LS-1 laser rangefinder is an extremely compact measuring tool developed for versatile conditions. Featuring a sleek aluminum oxide matte shell and durable engineering plastics, this device integrates world-renowned electronic components for high-precision performance. It includes a backlit LED display and supports both front and back datum measurement modes, making it an essential tool for accurate distance calculations.

Key Features

Design Recognition	Red Dot Award 2019 Winner
Build Materials	Aluminum Oxide Shell, Engineering Plastics

Technical Specifications

Measurement Modes

- Front Datum Measurement
- Back Datum Measurement
- Multiple Measurement

Display Type	Backlight LED
