

Compact Multi-Purpose Construction Vehicle

This compact construction machinery is designed for versatile earthmoving and material handling tasks. Equipped with a front-end loader, it can also function as an excavator and a bulldozer.

Product Overview

Versatile Construction Powerhouse

This compact construction vehicle is engineered for high-efficiency earthmoving and material handling tasks in tight spaces. By combining the capabilities of a front-end loader, excavator, and bulldozer into a single unit, it delivers exceptional versatility for construction, landscaping, and agricultural projects. Its robust build and superior maneuverability ensure reliable performance across a variety of demanding worksite conditions.

Capabilities

Suitable Applications

- Construction
- Landscaping
- Agricultural
- Earthmoving
- Material Handling

Operational Modes

Front-end Loader, Excavator, Bulldozer

Performance Features

Key Design Features

Compact Size • High Maneuverability • Robust Build
