

Compact Network Communication Hub

This compact device facilitates network communication. It is designed for efficient heat dissipation and space-saving integration, suitable for various communication applications requiring reliable connectivity.

Overview

Compact Network Communication Hub

This compact network communication hub is engineered for efficient data transmission and reliable connectivity in space-constrained environments. Featuring a symmetrical design and integrated thermal management, the device ensures consistent performance during operation. Its precise dimensions allow for seamless integration into various communication infrastructures.

Physical Dimensions

Measured Dimensions (mm)

Parameter	Value (mm)
Length A	225
Width B	255 ± 0.5
Width C	285 ± 0.5
Depth D	25
Depth E	215
Height F	32.8
Height G	12.7
Height H	21.8

Design Features

Thermal Management	Yes
Form Factor	Compact, Symmetrical, Space-saving
