

Compact Palm Nailer

This compact pneumatic nailer is designed for use in tight spaces and hard-to-reach areas. It drives common bulk finish, framing, and timber nails and features a magnetic tip for easy nail placement.

Overview

Compact Palm Nailer

This compact and powerful pneumatic tool is specifically engineered for driving nails in tight spaces and hard-to-reach areas where standard nailers cannot fit. Its ergonomic palm-style design enhances user comfort and control, significantly reducing fatigue during extended construction tasks. Featuring durable construction and a magnetic nail holder, it offers reliable performance for professionals working on framing, decking, and trim projects.
