

Compact Personal PTC Heater

This compact heater utilizes PTC (Positive Temperature Coefficient) heating elements for safe and efficient space heating. Its self-regulating temperature characteristics prevent overheating and ensure energy efficiency.

Product Overview

Compact and Efficient Heating

This portable PTC heater is designed for personal space heating, combining efficient self-regulating temperature control with a compact, cylindrical aesthetic. Featuring dual heat settings, it offers versatile performance for small to medium-sized rooms. With built-in safety features such as overheat protection and a protective metallic mesh, it provides a reliable and convenient solution for localized warmth.
