

Compact Portable Sewing Machine with Two-Speed Control

This compact sewing machine is designed for basic sewing tasks. It features a built-in light, two-speed control (high/low), automatic thread rewind, and the ability to sew sleeves.

Product Overview

Versatile Sewing Performance

This compact and portable sewing machine is engineered for efficiency in small-scale sewing tasks and hobbyist projects. Offering a user-friendly two-speed control system, it accommodates various fabric handling needs while providing essential features like a built-in light for precision work. Its flexible power options and sleeve-sewing capability make it an ideal choice for both beginners and portable professional use.
