

Compact Portable Television with Built-In Antenna

This compact television has a built-in antenna for receiving over-the-air broadcasts. Designed for personal use, it features a small screen, basic controls, and a swivel stand.

Overview

Compact Portable Viewing Solution

This compact portable television is designed for personal viewing convenience, featuring a built-in antenna for over-the-air broadcast reception. Its small screen size makes it suitable for use in various locations, providing flexibility for on-the-go entertainment. The unit includes essential controls for channel and volume adjustments, alongside a swivel stand for optimal viewing angles.
