

Compact PTC Ceramic Fan Heater with Oscillation

This compact PTC ceramic fan heater is designed for personal space heating. It includes 90-degree oscillation and an automatic shut-off function for overheat protection.

Product Overview

Efficient Personal Heating

This compact PTC ceramic fan heater is engineered for reliable, space-saving warmth in both residential and office environments. Utilizing advanced Positive Temperature Coefficient technology, it provides safe and consistent heat distribution. Its portable design features a convenient carry handle, making it an ideal solution for targeted heating in small spaces.

Technical Specifications

Heating Technology	PTC Ceramic
Heating Mechanism	Oscillation, Fan Assisted

Design and Controls

Design Highlights

- Compact portable form factor
- Black grille front
- Integrated carry handle

Control Method	Rotary Knob
Operational Indicator	Yes
