

Compact Refrigerator with R600a Refrigerant

This compact refrigerator utilizes a high-efficiency compressor for rapid cooling. Its design incorporates R600a refrigerant, adjustable spill-proof shelves, and removable door seals for easy maintenance.

Overview

High-Efficiency Compact Refrigerator

This professional-grade compact refrigerator is engineered for optimal performance and energy efficiency. It utilizes eco-friendly R600a refrigerant and advanced cooling technology to deliver rapid refrigeration while meeting international energy-saving standards. Designed with durability in mind, the unit features high-quality copper tubing to prevent leaks and a robust refrigeration system, making it a reliable solution for various professional storage requirements.

Technical Specifications

Refrigerant	R600a (Fluorine-free)
Evaporator System	Fin-tube
Internal Tubing Material	Copper

Key Features

Interior Lighting	Top-mounted LED
Hygiene Features	Removable door seals, Overflow-proof drainage, Spill-proof shelves

Storage Capabilities

Internal Components

- Adjustable spill-proof shelving
- High-capacity portable egg tray

Performance Metrics

Efficiency Compliance

International Level 1 Energy Standard
