Overview

Product Display

A compact, easy-to-operate rice milling machine suitable for home and small farm use.

Compact Rice Milling Solution

This compact rice mill is designed for efficient paddy processing in home, farm, and small-scale grain processing environments. Engineered for safety and durability, it features a no-blade design and robust construction suitable for continuous operation. The system is versatile, supporting multiple power sources including diesel, gasoline, or electric motors to suit various operational needs.

Technical Specifications

Model Number	N4.0C
Matched Power	3-5 HP

Key Features

Comparison showing the superior durability of our thick steel body and stainless steel rice mesh compared to standard alternatives.

Durability Metrics

8000 kg

Rice Mesh Capacity

Safety & Design

No-blade design, Overload protection, Compact structure, Adjustable milling pressure

Operational Versatility

Rice mill usage

rice

corn

millet

sorghum

The machine is versatile enough to process various agricultural grains including rice, corn, millet, and sorghum.

Compatible Power Sources

Diesel Engine • Gasoline Engine • Electric Motor

Processing Capabilities

- Paddy to White Rice
- Corn
- Millet
- Sorghum
