

Compact Road Sweeper with Water Spray System

This compact road sweeper is designed for urban cleaning of streets and sidewalks. It features an efficient sweeping system, a debris collection hopper, and a water spraying system for dust suppression.

Product Overview

Compact Urban Sweeping Solution

This compact road sweeper is engineered for high-efficiency cleaning of urban environments including streets, sidewalks, and paved surfaces. It features a robust chassis paired with an integrated water spray system for effective dust suppression during operation. Designed for agility, this vehicle offers excellent maneuverability and low-emission performance to meet modern city standards.

Operational Specifications

System Components

- High-efficiency side brushes
- Integrated water spray system
- Debris collection hopper
- Robust vehicle chassis

Operational Standards

Low Emissions, Dust Suppression, Urban Cleaning
