Product Overview

Compact Multi-Purpose Loader

This versatile skid steer loader is engineered for high performance in confined spaces, making it an ideal choice for municipal projects, warehouses, and ship decks. Featuring an integrated one-piece mainframe and a robust closed-circuit hydraulic system, it offers superior durability and maneuverability. Operators benefit from an ergonomic, ROPS/FOPS-compliant cab with intuitive pilot-controlled joysticks for maximum productivity and comfort.

Technical Features

Core Systems

- One-piece mainframe with integrated fuel and hydraulic tanks
- Closed-loop travel hydraulic system
- Proportional controlled pilot joystick
- Double-mode accelerograph (hand or foot control)
- Auto-leveling bucket system

Safety Standards

ROPS, FOPS

Operational Capabilities

Attachment System

Universal Quick Coupler • High Flow System Compatible

Supported Applications

Shoveling, Lifting, Excavating, Drilling

Maintenance

Maintenance Design

- Easy access via rear cover for daily tasks
- Forward-tilting cabin for major repairs
