

Compact Skid Steer Loader

This multifunctional skid-steer loader operates flexibly within narrow spaces. Its small external dimensions and related dimensions adapt to the limits of the working area.

Overview

Compact Performance

This multifunctional skid-steer loader is engineered for maximum flexibility in confined work environments. Its optimized mechanical structure ensures superior operator visibility while maintaining robust stability during operation. The machine features an advanced dual-circuit cooling system to keep hydraulic oil at optimal temperatures, ensuring long-term reliability for construction and landscaping tasks.

Technical Specifications

Key Performance Metrics

500 kg

Rated Operating Capacity

900 kg

Tipping Load

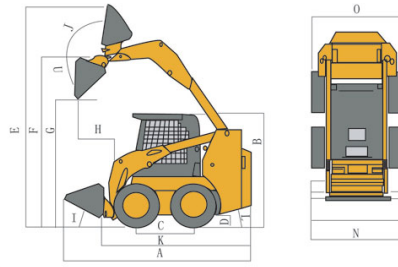

2450 kg

Operating Weight

Engine Specifications

- Engine Model: Perkins 403C-11
- Power Output: 24.8 HP / 25.2 PS

Dimensional Specifications

Technical diagram showing the optimized dimensions for narrow space operations.

Design Optimizations

- Reduced axis distance: 793 mm
- Outside axis distance: 1470 mm
- Scraper pan width: 1490 mm
