

Compact Skid Steer Loader

This compact skid steer loader features a maneuverable design suitable for operation in narrow spaces. Its multi-functional design offers a wide range of attachments.

Overview

Versatile Compact Skid Steer Loader

The JC60G is a compact skid steer loader engineered for high efficiency in construction and landscaping applications. Featuring a robust hydraulic system and a compact structure, it offers exceptional maneuverability in narrow spaces. Designed for productivity, it supports a wide range of attachments and includes a comfortable, open cabin with a mechanical control system.

Key Features

Operational Capabilities

- Compact structure for narrow space operation
- Open cabin design
- Mechanical control system
- Double accelerograph control
- Multi-function attachment compatibility
- Hydraulic braking system

Certifications & Standards
