Product Overview

Compact & Efficient Juicing

This compact slow juicer is engineered to maximize juice yield while preserving essential nutrients through a low-speed extraction process. Designed for convenience, it features a space-saving footprint ideal for small kitchens, offices, or travel. The system effectively separates pulp from juice, ensuring a smooth, high-quality beverage with every use.

Performance

Juice Yield Efficiency

90 %

Juice Rate

Extraction Method

Slow squeezing to minimize oxidation and nutrient loss

Design & Build

Key Features

- One-button operation
- Push-pull juice outlet handle
- Integrated drip-stop function
- Automatic pulp separation
- Easy to assemble and disassemble

Design Style

Compact • Portable • Easy-to-Clean

Material Safety

BPA-Free, PCTG Material
