

Compact Soil Tilling Machine

This compact machine is designed for soil tilling and cultivation. It features a robust engine, rotary tilling blades, adjustable handles, and a sturdy frame.

Overview

Efficient Soil Cultivation

This compact soil tilling machine is engineered for high-performance cultivation in diverse field environments. Featuring a robust engine and durable rotary tilling blades, it provides consistent power for effective soil preparation. Its adjustable handle design and sturdy frame ensure operator comfort and long-term durability, making it an essential tool for agricultural efficiency.

Technical Specifications

Model Identifier	:360
Machine Type	Compact Soil Tiller

Design & Build

Construction Features

- Robust engine
- Rotary tilling blades
- Adjustable handles
- Sturdy frame

Color Scheme	Red Engine, Green Body, Red Blades
