

Compact Spherical Air Sterilization Purifier

This compact purifier is designed for air purification and sterilization. It features a spherical shape with ventilation grilles and a control button on top.

Product Overview

Compact Spherical Air Sterilization Purifier

The SK-03-06 is a specialized compact sterilization purifier designed to provide efficient air cleaning in confined areas. Its unique spherical design allows for effective air intake and output through integrated ventilation grilles, ensuring consistent airflow. Simple to operate with a top-mounted control button, this unit is an ideal solution for maintaining hygiene and air quality in small living or working spaces.

Key Features

Model Number	SK-03-06
Primary Application	Air Purification, Sterilization, Household Use

Design and Interface

Shape	Spherical
Control Method	Top-mounted push button
Ventilation System	Yes
