

Compact Submersible Water Pump for Drainage

This submersible pump is designed for efficient drainage and irrigation. It is ideal for removing water from flooded areas, basements, or construction sites.

Product Overview

Compact Submersible Drainage Pump

The QDX3-30-0.75 is a compact, high-performance submersible pump engineered for versatile water transfer. Ideal for residential, agricultural, and construction applications, it provides reliable drainage for wells, fish ponds, and flooded sites. Its robust design ensures durability, while the integrated automatic operation simplifies usage in various demanding environments.

Technical Performance

Motor Power

0.75 kW

Power Rating

Flow Rate

3 m³/h

Flow Rate

Max Head

30 m

Features

Core Features

- Automatic float switch for water level control
- Compact and lightweight construction
- Durable housing for long-term reliability
- Versatile application range

Applications

Primary Uses

Agricultural Irrigation, Basement Drainage, Construction Site Dewatering, Fish Pond Maintenance, Residential Water Supply
