

Compact Switching Power Supply

This switching power supply is compact and efficient. It accepts a wide range of AC input voltages and provides a stable DC output, making it suitable for powering LED lighting, CCTV cameras, and other low-voltage devices.

Product Overview

Compact and Efficient Performance

This compact switching power supply is engineered for reliable performance in diverse electronic applications including LED lighting systems and CCTV surveillance. It features a robust perforated metal enclosure that ensures efficient heat dissipation during operation. Designed for global versatility, the unit supports wide AC input ranges and provides a stable, high-efficiency DC output.

Electrical Specifications

Power Rating

250 W

Total Power

24 V

Output Voltage

10 A

Rated Current

Model	S-250-24
Input Voltage Range	110V AC, 220V AC
AC Input Current	1.5 A

Certifications & Standards

Quality Standards

CE Certified • FC Compliant

Design Features

Key Physical Characteristics

- Compact form factor
- Perforated metal enclosure for heat dissipation
- Terminal block for easy wiring
