

Compact Terminal Device with Indicator Lights

This is a compact terminal device. It features multiple indicator lights for monitoring power, data streams, upstream activity, online status, and link performance.

Product Overview

Compact Industrial Terminal

This compact terminal device is designed for reliable data and power management in industrial settings. Featuring a robust chassis with integrated ventilation for thermal regulation, it ensures consistent operation under demanding conditions. The front interface provides real-time monitoring via a comprehensive array of dedicated indicator lights, allowing for quick status diagnostics of power and data connectivity.

Technical Interface

Indicator Indicators	Power, DS 1, DS 2, DS 3, Upstream (US), Online Status, Link Activity
