

Compact Tiller Cultivator

This compact tiller cultivator is designed for small to medium-sized gardens and agricultural applications. It features a robust engine, adjustable tilling depth, and ergonomic controls for ease of use.

Overview

Compact Tiller Cultivator

The 1WG4-1 is a compact and versatile tiller cultivator designed for small to medium-sized gardens and agricultural applications. It features a robust engine, adjustable tilling depth, and ergonomic controls for ease of use, making it ideal for preparing soil for planting, weeding, and cultivating. Its compact size allows for excellent maneuverability in tight spaces, while durable tines ensure efficient soil turning and improved aeration.

Operational Features

Primary Applications

Soil Preparation • Weeding • Cultivating

Safety Mechanisms

Protective Guards, Emergency Stop Mechanism

Maintenance

Maintenance Notes

- Regular maintenance ensures reliable performance and longevity
- Use diesel engine oil pump
- If the machine causes injury during operation, stop immediately and inspect
