

Compact Track Combine Harvester

This combine harvester is designed for small to medium-sized farms. It features a track drive system, a front-mounted reaping mechanism, and an integrated threshing and cleaning system.

Product Overview

Compact Track Combine Harvester SF180

The SF180 is a compact and efficient combine harvester designed specifically for small to medium-sized farming operations. It utilizes a robust track drive system to ensure superior traction across varying and difficult field conditions. The machine integrates advanced reaping, threshing, and cleaning systems into one reliable unit, optimizing crop gathering while minimizing waste.

Technical Specifications

Article Number	SF180
