

Compact Ultrasonic Cleaning Machine

This desktop ultrasonic cleaning machine is compact and portable. It utilizes ultrasonic waves to effectively clean various items for both consumer and industrial applications.

Product Overview

Professional Compact Ultrasonic Cleaner

This desktop ultrasonic cleaning machine provides high-efficiency cleaning through advanced ultrasonic power conversion. Constructed with high-quality stainless steel, the tank is designed for durability and superior waterproof performance. It is an ideal solution for cleaning jewelry, eyeglasses, dental instruments, and various small components in both consumer and professional environments.

Technical Specifications

Adjustable Timer	15 minutes
Material Composition	Stainless Steel Shell, Stainless Steel Tank, Argon Welded Sieve

Performance Features

Key Features

- Adjustable cleaning time from 1 to 15 minutes
- High-efficiency ultrasonic power conversion
- Advanced waterproof tank design
- Professional-grade argon welding
