

Compact Vehicle Air Purifier

This air purifier is designed to enhance air quality inside cars and trucks. Its compact design allows for simple placement, using advanced filtration to eliminate dust, pollen, smoke and other particles.

Product Overview

Clean Air On-the-Go

The Compact Vehicle Air Purifier is engineered to significantly improve cabin air quality for drivers and passengers. Featuring a sleek, space-saving design, it effectively removes common airborne irritants such as dust, pollen, and smoke. Its efficient operation and multi-stage filtration system ensure a healthier environment, making it an essential addition to any vehicle.

Technical Specifications

Filtration System

- Pre-filter
- HEPA filter
