

Compact Welding Machine

This compact welding machine is designed for various welding applications. It features adjustable amperage and voltage controls for precise welding parameters.

Product Overview

Professional Compact Welding Solution

The NBC-200B is a compact and robust welding machine engineered for versatility in industrial environments. It provides precise control over amperage and voltage, allowing operators to achieve consistent results across various metal fabrication and repair tasks. Equipped with an integrated wire feeder unit and enhanced safety systems, this unit ensures both efficiency and operator protection for demanding professional applications.

Technical Specifications

Model	NBC-200B
Adjustable Parameters	Amperage Control, Voltage Control
Wire Feeder	Yes

Key Features

Operational Highlights

200 A

Rated Output

Suitable Applications

- Metal Fabrication
- Repair Work
- General Welding Tasks

Safety and Compliance

Operator Protection	Yes
