

Compact Wet Tile Saw

This compact wet tile saw is designed for cutting ceramic tile, slate, marble, and granite. It features a powerful motor for efficient cutting and a water cooling system to minimize dust and debris.

Product Overview

Compact Wet Tile Saw

This compact wet tile saw is engineered for high-precision cutting of ceramic tile, slate, marble, and granite. Equipped with a powerful motor and an integrated water cooling system, it effectively manages dust and debris during operation. Its lightweight and compact frame ensures easy transportation and storage, making it an essential tool for professional tiling projects.

Technical Specifications

Core Features

- Powerful motor for efficient cutting
- Water cooling system for dust suppression
- Adjustable cutting guide
- Compact design for portability

Compatible Materials

Ceramic Tile, Slate, Marble, Granite

Operational Metrics

Project Scale

Small-sized projects • Medium-sized projects
