

Compact Wheel Loader for Construction

This compact wheel loader is designed for both construction and agricultural applications. It features articulated steering for maneuverability, a robust hydraulic system, and a large-capacity bucket for efficient material handling.

Product Overview

Compact Wheel Loader for Construction

This professional-grade compact wheel loader is engineered for high performance in versatile construction, highway, and mining environments. It features a robust full hydraulic drive system and four-wheel drive capability to ensure reliable operation across varied terrain. The design prioritizes operator safety and comfort while delivering an efficient solution for material handling and heavy-duty site tasks.

Technical Specifications

Drive Train	Four-wheel drive with full hydraulic transmission
Operation Type	Medium and small size loader

Key Features

Design Advantages	Advanced Technology, Reliable Running, Easy Operation, Safe Traveling
-------------------	---

Applications

Suitable Environments

- Engineering construction
- Highway operation
- Mine operation
- Agricultural applications
