

Compact Window Air Conditioner

This compact air conditioning unit is designed for localized cooling. It is suitable for small to medium-sized rooms and provides efficient temperature regulation and air circulation.

Product Overview

Compact Window Air Conditioner

This compact window air conditioning unit is designed for efficient, localized cooling in residential or commercial environments. Featuring a robust, anti-corrosion metal body, the unit offers high durability and protection against environmental factors. With intelligent touch controls and an infrared remote, it provides simple and comfortable operation for any user.

Performance & Cooling

Cooling System Features

- High-performance evaporation filters
- Saturated high evaporation capability
- Professional open-type water distributor
- Anti-blocking water supply system

Cooling Effect

High Efficiency • Saturated Evaporation

Design & Construction

Construction Materials	Anti-UV, Anti-corrosion, Anti-aging, Anti-distortion, Metal Body
Installation	Window or Wall Mount

Technical Specifications

Motor Configuration	Single-phase three-speed motor
Protection Level	High-degree waterproof protection

Control & Operation

Control Options

- Infrared remote control
- Intelligent touch design
