Product Overview

Compact Wood Palm Router

This compact palm router is engineered for precision woodworking, featuring a high-performance 4-pole copper motor that delivers 19500 RPM for smooth, consistent cutting. Designed with ergonomics in mind, the tool utilizes a durable PA6+TPE shell with a soft grip for comfortable, single-handed operation. It includes advanced safety features such as emergency stop, power-off protection, and a 2000mAh lithium battery with comprehensive thermal and electrical monitoring.

Technical Specifications

No-Load Speed	19500 RPM
Motor Type	4-Pole Copper Winding
Input Voltage	12 V

Power & Battery

Charger Specifications

230 V Input	12 V Output	2.4 A Output Current
-----------------------	-----------------------	--------------------------------

Battery Indicators

- Red
- Yellow
- Blue

Battery Capacity	2000 mAh
------------------	----------

Design & Safety

Housing Material	PA6 + TPE (Soft Grip)
Safety Features	Shaft Lock, Emergency Stop, Power-off Protection, Temperature Protection, Voltage Protection, Current Protection

Certifications

Certifications	GS • CE • EMC
