

Complete Steering Column Assembly

Complete steering column assembly designed for automotive applications. It includes the steering shaft, housing, and associated hardware for ease of installation and is a direct replacement for worn or damaged original equipment.

Product Overview

Professional Steering Column Assembly

This complete steering column assembly is engineered for reliable automotive steering performance, serving as an ideal direct replacement for damaged or worn original equipment. The unit is designed for seamless integration, featuring a robust construction with a black finish that ensures durability in demanding automotive environments. It includes an integrated ignition switch mounting and an adjustable tilt mechanism, providing both convenience and professional-grade functionality for technicians and vehicle maintainers.
