

Component Video Cable with RCA Connectors

Component video cable transmits analog video signals. It features color-coded RCA connectors for easy connection of DVD players, set-top boxes, and other video sources to displays.

Overview

High-Quality Component Video Connectivity

This component video cable features industry-standard RCA connectors designed for reliable transmission of analog video signals. It is an essential solution for connecting legacy media equipment such as DVD players and set-top boxes to modern or compatible display units. The color-coded design ensures quick and error-free installation in professional or home theater setups.

Technical Details

Common Applications

- DVD Players
- Set-top Boxes
- Analog Video Displays

Connector Type	RCA
Signal Type	Analog Component Video

Features

Key Features	Color-coded connectors, Easy identification, Standard RCA interface
