

# Composite Decking Planks with Grooved Surface

These composite decking planks are designed for outdoor use, offering durability and weather resistance. The planks feature a grooved surface for enhanced traction and a hollow core construction for reduced weight and improved insulation.

## Product Overview

### Sustainable Outdoor Decking Solution

These composite decking planks are engineered for durability and weather resistance, making them an ideal choice for patios, decks, and various outdoor living spaces. Constructed from a blend of recycled wood fibers and plastic, they provide a sustainable and low-maintenance alternative to traditional wood. The design features a grooved surface for enhanced traction and a hollow core for improved insulation and reduced weight.

## Technical Specifications

Surface Texture	Grooved
Core Construction	Hollow core
Material Composition	Recycled Wood Fibers, Plastic

## Key Benefits

### Key Advantages

- Weather-resistant for outdoor longevity
- Enhanced traction via grooved surface
- Lightweight design
- Improved insulation properties
- Low-maintenance requirements

## Application

### Recommended Applications

Patios • Decks • Outdoor Living Spaces
