

Compound Fertilizer NPK 15-10-15

This is a compound fertilizer with a total nutrient content greater than or equal to 40%, composed of N-P2O5-K2O at 15-10-15. It adheres to the GB15063-2001 standard.

Product Overview

High-Performance Compound Fertilizer

This compound fertilizer provides a balanced nutrient profile of 15-10-15 (N-P2O5-K2O), designed to support robust crop development. With a total nutrient content of 40% or greater, it is formulated to meet professional agricultural standards for efficiency and growth. The product is packaged in 50kg units and adheres to established quality and safety regulations.
