

Compressed Air Dryer

This industrial air dryer removes moisture from compressed air systems. It is suitable for pneumatic tools, spray painting, and sensitive manufacturing processes.

Overview

Industrial Compressed Air Dryer

This industrial air dryer unit is engineered to efficiently remove moisture from compressed air systems, ensuring optimal performance for critical equipment. Its compact design allows for space-saving installation in various industrial environments. The unit features an integrated control panel and pressure gauges, providing operators with precise monitoring and adjustment capabilities for reliable system maintenance.

Technical Specifications

Series	AIR DRYER 30
Suitable Applications	Pneumatic Tools, Spray Painting, Sensitive Manufacturing

Features

Monitoring & Control

- Integrated control panel
- System pressure gauges
- Adjustable settings

Design Benefits

Compact Footprint • Moisture Removal • Industrial Grade
