

# Computer Keyboard

The computer keyboard is an essential input device for computers. Its internal structure supports the keys and ensures proper key alignment for smooth keystrokes.

## Product Overview

### Professional Grade Keyboard Construction

This keyboard is engineered with a focus on structural integrity and precision manufacturing. Featuring a robust frame designed for rigidity and long-term durability, the internal assembly ensures consistent key alignment and smooth keystroke performance. It is an ideal choice for environments requiring reliable and responsive input hardware.

## Construction & Design

Frame Material	Aluminum or metal alloy
Internal Structure	Precision-molded plastic
Key Features	Rigid Frame, Precision Molded, High Durability
