

Computer Monitor with Warning Reflector

This monitor is designed for computer peripheral applications. It features a triangular warning reflector with red outer and inner triangles for enhanced visibility.

Product Overview

Professional Warning Display

The YJ-D9-12 is a specialized monitor designed for computer peripheral applications where clear visual signaling is required. It features a distinct triangular warning reflector with high-visibility red inner and outer markings. The unit is engineered for versatility and convenience, incorporating foldable support legs to ensure both structural stability during use and compact storage when not required.
