

Computer Peripheral Audio System with Subwoofer

This computer peripheral audio system enhances the user's audio experience. It includes a subwoofer and two satellite speakers for balanced sound output.

Product Overview

Professional 2.1 Channel Audio System

The V-300 is a versatile 2.1 channel audio system specifically engineered for desktop computing environments. It features a dedicated subwoofer for rich bass performance paired with satellite speakers to deliver clear mid and high frequencies. This active speaker system offers professional-grade control over volume, bass, and treble to tailor your listening experience for both entertainment and productivity tasks.

Technical Specifications

Peak Power

40 W

Total System Peak Power

Audio Hardware Details

Component	Impedance	Power Output
Subwoofer	4 Ohm	20W
Satellite Speaker	4 Ohm	10W

Connectivity & Compatibility

Signal Input	3.5mm stereo plug wire
Input Impedance	10 KOhm

Physical Dimensions

Unit Dimensions

- Subwoofer: 140mm (W) x 260mm (H) x 275mm (D)
- Satellite: 95mm (W) x 185mm (H) x 120mm (D)

Electrical & Controls

Adjustable Controls	Master Volume, Bass Adjustment, Treble Adjustment
Input Voltage	AC220V 50Hz / 230mA
