

Computerized Horizontal Knitting Machine

This computer-controlled horizontal knitting machine is designed for versatile textile production. It features multi-yarn carriers for complex patterns and a user-friendly interface.

Overview

High-Performance Horizontal Knitting Solution

This computer-controlled horizontal knitting machine is engineered for high-efficiency textile production. Featuring advanced multi-yarn carriers, it enables the creation of complex, high-precision patterns with ease. Its robust industrial construction ensures reliability, making it an ideal choice for diverse knitted fabric and garment manufacturing requirements.

Technical Specifications

Model Number	VF422D-III
Machine Type	Computerized Horizontal Knitting Machine

Features

Control System

User-friendly interface • Precision programming

Key Capabilities

Computer-controlled, Multi-yarn carriers, Complex pattern support, Industrial grade
