

# Concave Disc Harrow Blade

This concave disc blade is suitable for use in disc harrows and plows. It is constructed from hardened steel for enhanced durability and wear resistance.

## Product Overview

### Concave Disc Harrow Blade

This concave disc blade is engineered for efficient tillage operations on both dry cultivated and fallow land. Designed for integration into agricultural implements like disc harrows and plows, it offers robust performance in demanding soil conditions. The blade is constructed from hardened steel to ensure high durability and resistance to wear during extended field use.

## Technical Specifications

### Surface Finish

Black Finish

### Mounting Features

- Central mounting hole
- Multiple smaller attachment holes

### Material

Hardened Steel

### Compatible Implements

Disc Harrows, Plows
