

Concealed Duct Split Air Conditioner

This duct split air conditioner is designed for concealed installation, providing efficient cooling and heating through ductwork. The unit incorporates a high-performance compressor and optimized heat exchangers for energy-saving operation.

Overview

Concealed Duct Split Air Conditioner

This concealed duct split air conditioner is expertly designed for discrete, high-performance climate control in both residential and commercial settings. Its low-profile architecture allows for flexible installation within ceilings or confined spaces, ensuring a clean, unobtrusive aesthetic. Engineered with a high-efficiency compressor and optimized heat exchangers, the system provides reliable cooling and heating while maximizing energy savings.

System Features

Control Interface

- Wired remote control
- Wireless remote control
- Timer function
- Temperature setting adjustment

Installation Style

Concealed duct

Airflow Customization

Multi-speed fan, Uniform distribution
