

Concrete and Asphalt Cutter with Water Tank

This construction machine features a robust engine mounted on a wheeled frame. It incorporates a circular saw blade partially enclosed by a guard and a water tank for dust suppression.

Overview

Professional Concrete and Asphalt Cutting Solution

This robust concrete and asphalt cutter is engineered for heavy-duty construction and road maintenance tasks. Featuring a powerful, likely diesel-driven engine, it is mounted on a durable wheeled frame for excellent portability and control on job sites. The unit includes an integrated water tank system designed for efficient dust suppression and blade cooling, ensuring optimal performance and longevity during intensive cutting operations.

Key Features

Model Identifier	HQ120S
Suitable Applications	Concrete Cutting, Asphalt Cutting, Road Maintenance, Construction

Technical Specifications

Cooling System	Yes
Cooling Method	Integrated Water Tank
Frame Material	Heavy-duty metal
Mobility	Wheeled frame
